Nintendo of America - Quality Assurance Division
Internet Channel v0.8.54 (USA)

TESTING RECORD
LOCATION: up somebody's ass

SUBJECT ID: for nerds only
DATE OF TEST: don't have one
BUILD DATE: it was built
TEST DURATION: time passed

SUMMARY

Subject played [with his testicles] for 69 minutes from 13:51 - 15:00. Anomalies, bugs, unexpected behaviors, and observations are listed below. The test was concluded when **subject's stockpile of pornography was exhausted.**

During testing, subject notes that he has **mess in the playtesting room,** experienced **degrading performance issues** with the Internet Channel, and comes out about his **chronic loneliness.**

SUBJECT INFORMATION

Name: Who am I anyway?
D.O.B.: Dobby ought to not give a fuck!
Sex (M/F): Yes please!!!

HARDWARE & ENVIRONMENT INFORMATION

Console Platform: RVL-001
Console ID: uhh numbers
Firmware Version: its right fucking there at the top right
Controller: Wii Remote Controller and Nunchuk (RVL-003, RVL-004)
Accessories:

- Wii USB 2.0 LAN Adapter (RVL-015)

PROBLEMS FOUND

I. **I'm desperately lonely because my hand is my only lover :-(**

STEPS TO REPRODUCE:

1. Have a big computer with access to your dad's collection.
2. Be alone in a noise-isolated room.
3. Host the collection on your private server.

4. Access the web server and click on whatever video.
5. Jizz around 6-9 times in the span of 150 minutes. Either way, nut.

II. **The playtesting room does not have a trash can to dispose tissues.**

III. **The console cannot play video files continuously.**

STEPS TO REPRODUCE:

1. Open the Internet Channel on any Wii system.
2. Go to any video site or host a video through localhost.
3. Open the video.
4. Take note of the frequent frame stutters and audio delays.

IV. **Webpages take way too long to load with Ethernet adapter.**

STEPS TO REPRODUCE:

1. Open the Internet Channel on a Wii system with the Ethernet Adapter initialized.
2. Go to any website, or a page hosted via localhost.
3. Take note of the amount of time it takes to fully load the webpage.

SUGGESTIONS

I. Add wired and/or wireless keyboard and mouse support.

II. Add Synapse AI Accelerator support for hardware accelerated rendering.

NOTES

I. Don't ask how the fuck I managed to get away with any of this.

II. Please give my thanks to the Japanese transfer Haruka for discovering the exploit.

III. I'm definitely getting fired, but at this point I just do not give a shit anymore. Sayonara, motherfuckers.

NAME OF RECORDER: Your good ol' pal Eddie :-)
